• Investment involves risk. Past performance is not indicative of future performance. Investor should not make any investment decision solely based on the information provided on this material. Investors should refer to the Prospectus and the Key Facts Statement of the Sub-Fund for further details, including the product features and risk factors before making any investment decisions.
• Value Partners HK-US Dividend Low Volatility ETF (the "Sub-Fund") is passively managed and the Manager will not have the discretion to adapt to market changes due to the inherent investment nature of the Sub-Fund.
• The Sub-Fund offers both listed class of Shares (the "Listed Class of Shares") and unlisted classes of Shares (the "Unlisted Classes of Shares"). Investors of Listed and Unlisted Classes of Shares are subject to different pricing and dealing arrangements. Investors of the Listed Class of Shares in the secondary market could only redeem at the prevailing market price (which may diverge from the corresponding NAV) and may have to exit the Sub-Fund at a significant discount. Shares of the Unlisted Classes of Shares are sold through intermediaries based on the dealing day-end NAV and are dealt at a single valuation point with no access to intraday liquidity in an open market.
• The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
• The Sub-Fund's investments are concentrated in Hong Kong and the United States. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Hong Kong and the United States markets.
• Some of the constituents of the Index are mega-capitalisation companies that are relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. The high valuation of mega-capitalisation companies can make them more susceptible to market corrections, downturns and changes in interest rates.
• Securities lending transactions may involve the risk that the borrower may fail to return the securities lent out in a timely manner and the value of the collateral may fall below the value of the securities lent out.
• The Sub-Fund may be subject to tracking error risk, which is the risk that its performance may not track that of the Index exactly.
• As the stock market may be open when Units in the Sub-Fund are not priced, the value of the securities in the Sub-Fund's portfolio may change on days when investors will not be able to purchase or sell the Units. Differences in trading hours between the markets and the SEHK may also increase the level of premium or discount of the Unit price to its NAV.
• Payment of distributions out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the NAV per Share of the Sub-Fund.

## Investment objective

The investment objective of the Fund is to provide investment results that, before deduction of fees and expenses, closely correspond to the performance of the CCX HK-US Dividend Low Volatility Index (HKD Net Return).
