

March 2018

- Value China A-Share ETF (the "Fund") is a physical index-tracking fund which aims to provide investment results, before fees and expenses, that closely correspond to the performance of the FTSE Value-Stocks China A-Share Index ("Index").
- The Fund invests directly in A-Shares included in the Index through the Renminbi Qualified Foreign Institutional Investors (RQFII) investment quota granted to the Manager and the Shanghai-Hong Kong Stock Connect. Investors will be subject to certain risks including repatriation risk, custodial risk, broker risk, regulatory risk and risks associated with the Manager's RQFII status. In addition, the RQFII policy and rules are relatively new and there may be uncertainty in implementation and such policy and rules are subject to change. All these may adversely impact the Fund.
- The Fund and its primary investments are denominated in RMB. RMB is currently not a freely convertible currency and is subject to foreign exchange control policies, as well as repatriation restrictions imposed by the PRC government. Investors whose base currencies of investments are not in RMB should take into account the potential risk of loss arising from fluctuations in value between such currencies and the RMB.
- The Fund is subject to emerging market risks. Generally, investments in emerging markets are subject to a greater risk of loss than investments in a developed market due to greater political, economic, taxation and regulatory uncertainty and risks linked to volatility and market liquidity etc.
- The Fund is also subject to concentration risk as a result of investing only in a single geographical region. Adverse developments in such region may affect the value of the underlying securities in which the Fund invests.
- The Fund has dual counter traded units which are traded and settled in both RMB and HKD. The nature of the dual counter may make investment in the units riskier than in single counter units or shares of an SEHK listed issuer. Investors without RMB accounts may buy and sell HKD traded units only.
- There is no assurance that Fund will pay dividends. The Manager may at its discretion pay dividends out of the capital of the Fund or pay dividend out of gross income while all or part of the fees and expenses of the Fund are charged to/paid out of the capital of the Fund. Dividends effectively paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such distribution involving payment of dividends out of the capital may result in an immediate reduction of the Fund's net asset value per Unit.
- The Index may experience periods of volatility and decline and the price of units of the Fund is likely to vary or decline accordingly. As the Fund is not "actively managed", the Manager will not adopt a temporary defensive position against any market downturn. Investors may lose part or all of their investment.
- The units are traded on the Stock Exchange of Hong Kong Limited ("SEHK"). Trading prices of units on the SEHK are subject to market forces and the units may trade at a substantial premium/discount to the net asset value of the Fund.
- An affiliated company of the Manager and the Investment Adviser of the Fund assists with the compilation of the Index and accordingly potential conflicts of interests may arise.
- You should not make investment decision on the basis of this website alone. Please read the prospectus for details and risk factors.

Investment objective

To provide investment results (before fees and expenses) that closely correspond to the performance of the FTSE Value-Stocks China A-Share Index.

Sector exposure ⁵

Source: HSBC Institutional Trust Services (Asia) Limited, FTSE and Bloomberg, data as at the last valuation date of the month as stated above, unless stated otherwise. Performance is in HKD, NAV to NAV, with dividend reinvested and net of fees.

1. The above profile is based on market consensus forecast as derived from S&P Capital IQ and Bloomberg. Harmonic mean methodology is applied to calculate the forecast P/E ratio and P/B ratio. Note that the manager's internal estimates may differ significantly from S&P Capital IQ and Bloomberg estimates. 2. Yield is calculated based on the dividend per Unit divided by the ex-date NAV per Unit. It is estimated and for reference only and does not represent the performance of the Fund. All dollar amounts are in RMB unless otherwise stated. 3. There is no guarantee that such dividends will be made nor will there be a target level of dividend payout. 4. The awards recognize ETF products issued by CAMAHK members with at least 1 year of historical performance as of 30 September 2017. 5. Classification is based on Industry Classification Benchmark (ICB). Due to rounding, percentage may not add up to 100%.

Investors should note investment involves risk. The price of units may go down as well as up and past performance is not indicative of future results. Investors should read the prospectus for details and risk factors in particular those associated with investment in emerging markets and the arrangement in the event that the Fund is delisted. The Fund's prospectus is available and may be obtained from website. Investors should also note that the Fund is different from a typical retail investment fund, in particular, units in the Fund may only be created or redeemed directly by a participating dealer in large unit sizes.

Information in this report has been obtained from sources believed to be reliable but Sensible Asset Management Hong Kong Limited does not guarantee the accuracy or completeness of the information provided by third parties.

This document has not been reviewed by the Securities and Futures Commission. Issuer: Sensible Asset Management Hong Kong Limited.
